Business Update — CCI Group

CCI Group Invests ₹227 Crore in Grade-A Logistics Park in Sohna-Silani, Gurugram

- *Spanning 9.5 lakh sq. ft., the facility will offer seamless connectivity to key consumption hubs across Delhi NCR, Gurgaon, Noida, Faridabad, Western parts of UP and Rajasthan, enabling faster turnaround, lower costs, and efficient last-mile delivery.*

Sohna-Silani, Gurugram, 24th April 2025: CCI Group, India's leading integrated logistics service provider, announces a total investment of ₹227 crore in the development of a Grade-A warehouse facility in Sohan-Silani, Gurugram. Spanning approximately 9.5 lakh square feet, this flagship development is aimed at addressing the growing demand for high-quality industrial and warehousing spaces in the region, while reinforcing CCI Group's position as a key player in India's logistics sector.

Haryana's location along key national trade corridors has positioned it as a critical node in India's logistics network, and the Sohna-Silani site lies just a few kilometers from some of the country's most vital expressways. These include the Delhi-Noida-Direct (DND) Flyway, Mumbai-Delhi Expressway, Kundli-Manesar-Palwal (KMP) Expressway, Western Peripheral Expressway (WPE), and Kundli-Ghaziabad-Palwal (KGP) Expressway. This connectivity enables seamless access to major consumption centers across Delhi NCR, Gurgaon, Noida, Faridabad, and even parts of Western Uttar Pradesh and Rajasthan. Leveraging its strategic location, CCI Group's Sohna-Silani logistics park will be serving a diverse range of industries, including e-commerce, retail, FMCG, automotive, manufacturing, and third-party logistics, ensuring faster turnaround times, lower operating costs, and improved last-mile efficiency.

Designed to address the increasing demand for scalable warehousing infrastructure, the Sohna-Silani facility incorporates features such as a clear height of 12 meters, FM2-grade flooring, cross dock multiple loading

Business Update — CCI Group

points, and wide internal RCC roads to support efficient vehicle circulation. Its modular layout and flexible design allow the space to be customized according to the operational needs of varied tenants.

In addition to the core infrastructure, the facility emphasizes sustainability and safety in its design and operations. It is solar-ready and integrates passive ventilation systems, ample natural lighting, energy-efficient LED fixtures, rainwater harvesting, and green landscaping-reflecting CCI Group's commitment to environmentally responsible development. A dedicated Sewage Treatment Plant (STP) ensures zero water waste, with treated water being repurposed for landscaping and utility needs, including support for fire safety systems. The facility is equipped with robust firefighting infrastructure such as water and foam-based sprinklers and fire hydrants, reinforcing both environmental efficiency and operational safety through a holistic, future-ready approach.

The total project cost encompasses land acquisition, construction, and infrastructure development. The project is expected to generate over 300 direct jobs during the construction phase, along with more than 250 indirect employment opportunities in logistics operations, security, and support services. CCI Group also intends to collaborate with local authorities to introduce skill development initiatives in areas such as sustainable construction, industrial operations, and site management.

Commenting on the development, **Mr. Satish Sharma, Executive Director, CCI Group**, said, *"The demand for institutional-grade warehousing in India continues to rise, particularly in regions like Haryana that offer strong connectivity and access to consumption centres. Our investment in Sohna-Silani reflects both the current market appetite and our long-term view on infrastructure-led growth in the logistics sector. This facility is designed not only to meet operational requirements today but to adapt to the evolving needs of businesses in the years to come."*

The Sohna-Silani development is a critical milestone in CCI Group's long-term plan to establish a pan-India network of modern distribution centers, positioning the company as a prominent player in India's evolving industrial & warehousing real estate landscape.

About CCI Group:

CCI Group is India's leading 4PL Integrated Logistics and Supply Chain company with a rich legacy of 48 years. A strong network across 48 cities India with warehouses and Logistic Parks in key locations (over 7 million sq. ft. of Fully Compliant, Grade A warehousing pan India scaling up soon to 15 million sq.ft. in key warehouse clusters across India), supported by a dynamic workforce of over 1,000 people. CCI has established itself as a prominent player in India's logistics sector and also operates globally, with a network spanning over 105 countries. It also has a significant presence at more than 20 airports and seaports across India.

Serving more than 1000 clients across diverse industries, including E-commerce, Retail, FMCG, Healthcare, Automotive, and more, CCI excels in providing seamless supply chain solutions. The company's operations encompass transportation, last-mile delivery, international freight forwarding, warehousing, and in-plant logistics.

With a fleet of over 1,200 vehicles and a focus on sustainable transport, CCI is committed to innovation, efficiency, and delivering tailored logistics solutions to meet client needs.

Business Update — Windlog

Change Management for Hyperion ARCS Netting**Overview of the To Be Process**

CNC will share required **SOA format** in which Netting participants will have to share their data (O/s AR+AP at invoice level). On receipt of the SOA from Netting participants, CNC will then upload these SOA a shared file folder where, **EPM** will automatically process the file & then Records will match with counter party books. **NC will share required SOA format in which Netting participants will have to share their data (O/s AR+AP at invoice level). On receipt of the SOA from Netting participants, CNC will then upload these SOA a shared file folder where, EPM will automatically process the file & then Records will match with counter party books.**

Data would be processed as and when data file (SOA template) would be placed in the shared folder for initial upload and changes. Post processing, matching report will be shared

We are currently planning to have 4 pre reporting and 1 final reporting to be executed during One ARCS Hyperion Netting cycle. The number of pre-cycles can be increased or decreased by CNC as and when required.

Basis matching done in **EPM** system, Netting Participants will receive **MATCHED**, **SUGGESTED MATCH** and **UNMATCHED** report at invoice level during all the netting cycles (Pre & Final run)

Basis Pre Reports shared by CNC, Netting Participant can perform their Follow-up with counter parties on their **SUGGESTED MATCH** and **UNMATCHED** transactions, They can add approved AP invoices in **SOA template** & follow-up with counter parties for their unapproved AR invoices as mentioned in unmatched report. For Next Pre-run or Final Run, Netting participants will have to share their Revised **SOA template** CNC and the same will be uploaded in Replace Mode for the participant's complete data. If CNC doesn't receive **Revised** version of your SOA then last received version in that month Netting will be considered for matching.

On Final day of the run, Final Matched Transactions and Final Netting Settlement report will be shared by CNC via e-mail.

Netting Participants will book manual netting vouchers in their ERP as being done earlier, based on the Final Netting Settlement report shared by CNC. Settlement should be done "To / By" CNC as per amount mentioned in Settlement Report & Dates mentioned in Netting Calendar.

Change Management for Hyperion ARCS Netting

HYPERION BENEFITS

- Automated & Transparent Invoice approval process
- Dispute resolution at invoice level
- Proper Audit trail at invoice level for Balance confirmation
- Auto matching/ confirmation & auto Netting Journal booking
- No more holding back of approved invoices

FAQ's

Q1. How would I know if I made a mistake in the manual Excel upload template?

Ans: In Manual Excel SOA Template we have given Instructions on “How to fill Excel SOA” Users can read those Instructions carefully before updating SOA. Also we have develop a macro within SOA template which can validate SOA for all possible human errors and provide error log to users which enable them to correct their mistakes.

Q2. Do I need to control use of any special characters in the manual Excel upload template?

Ans: Yes, You can not use special characters like comma (,) & semi colon (;) anywhere in excel SOA template. Also you should not keep any single cell blank if you have use any invoice line. If there is no information to provide then you can use “NA”

Q3. What if the payable is not booked at all or payable is booked wrongly?

Ans: If any payable invoice is Approved but you have not mentioned in your initial SOA then you can add that invoice in your Revised SOA & share that with CNC in order to match that invoice in next Pre/Final Run. If you have booked any

Receivable or Payable invoice incorrectly then you need to correct that in your ERP system as well as in Revised SOA & share correct data with CNC in order to match those invoices in next Pre/Final Run

Q4. Will “Data Confidentiality” will be maintained during this Netting process?

Ans: Yes, 100% This Hyperion Netting Activity will be carried out by 3rd party vendor & Your Receivable & Payable data will not be shared within Network. In Pre & Final Reporting as well you will receive only those transactions data which is either in your books & in your counterparty books (which related to your office only) Hence Pls. be 100% assure about “Data Confidentiality”
