Message from HCL

Dear Members,

Season's Greetings!

During our last Global Meeting in Manila, we agreed that our **2027 Global Meeting will be held in Mexico during the second week of April 2027, between 5th and 9th April.**

We are currently working with our Event Management partner to finalise the arrangements and will shortly share the complete schedule along with the pricing details.

The timing has been finalised in consultation with our ExCom members, as we felt that this schedule would make it easier for members to attend **Intermodal in São Paulo from 13th to 15th April** the following week. This should help save considerable time, money, and energy for members planning to attend both events.

We therefore request you to block these dates in your calendars and our team will be waiting to greet you in Mexico.

Members Bringing Members Programme

During our Manila meeting, we also discussed the importance of our **“Members Bringing Members”** programme.

We have always believed that one of the best ways to grow our network is through recommendations from our existing members. New members who are introduced, tested, and trusted by our current members can strengthen the network and contribute to its long-term growth.

As part of this initiative, we are pleased to announce the following:

- Any member who brings **5 new members** to the network during the two-year period from **October 2026 to September 2028** will receive **one free entry** to one of our Global Meetings held in **2027, 2028, or 2029.**
- Any member who brings **8 new members** during the same period will receive **two free entries** to our Global Meetings held between **2027 and 2029.**
- Any member who brings just **3 new members** during the same time will get 50% discount in participation fees for 1 participant during any of the meetings held between **2027 and 2029.**

We look forward to your active support in helping the network grow through our own collective strength and trusted relationships.

Message from HCL

Global Logistics Market Update

The global scenario for the logistics industry has not improved significantly over the past month. **Brent crude prices have been hovering around the \$100 level**, adding to concerns that the geopolitical situation in the Middle East remains unresolved.

Meanwhile, space availability is gradually improving; however, congestion and network disruptions continue to restrict effective capacity. Market conditions are becoming increasingly trade-specific, with some corridors softening while others remain firm.

Carrier competition is also increasing, making further broad-based rate increases more difficult to sustain. Operational reliability remains a key challenge, with congestion and equipment constraints continuing to affect schedule performance.

In short, **geopolitical and weather-related disruptions continue to drive volatility across global supply chains**, and the coming months are likely to remain challenging for the industry.

We sincerely appreciate your continued support and participation in the growth of our network.

Warm regards,
Subrata Mukhopadhyay

HCL Logistics Network

Business Update — Eastrong, China

Eastrong Success Cases Showcase

Professional Logistics, Global Delivery

Award Recognition

Eastrong Shortlisted for ACBECA 2026 "Supply Chain Resilience & Integration Excellence Award" Final

With more than 20-year-long experience in the China-Australia trade corridor, Eastrong stands out among numerous participating enterprises thanks to continuous innovation in multimodal transport resilience, end to end collaboration and green logistics, and has officially advanced to the final round of ACBECA 2026 hosted by AustCham Shanghai and supported by Austrade.

What sets us apart:

- **Resilience** — Flexible multimodal transport network to maintain supply continuity during peak seasons and secure supply amid critical periods
- **Collaboration** — Deliver closed-loop end-to-end services from consolidation warehouses to retail store shelves for leading Australian and New Zealand retail clients
- **Expertise** — WHO GDP and CEIV Pharma dual-certified pharmaceutical cold chain with 24/7 visualized temperature control
- **Sustainability** — ECO Delivery low-carbon shipping with firm commitment to carbon reduction goals

The final will be held online in the near future. Award-winning enterprises will be honoured at the official Austrade reception during CIIE 2026.

Autonomous Vehicles Going Global

L4—Level Autonomous Vehicles RORO Transportation | Shanghai → Koper Port, Slovenia

Eastrong has successfully completed cross-border transportation of a batch of L4-level autonomous vehicles from Shanghai, China to Koper Port, Slovenia with a professional RORO (Roll-on/Roll-off) shipping solution.

Project Highlights:

- **High-tech cargo:** L4-level autonomous vehicles that impose extremely high requirements on transport safety and stability
- **Professional RORO solution:** Vehicles roll directly on board to reduce loading & unloading operations and protect precision equipment including sensors and radars
- **Asia-Europe main lane:** Direct sailing from Shanghai to Koper with around 50-day transit time, linking China's manufacturing hub with the gateway to the European market

Operation site of the wing van. Wing doors are fully opened, and overlength pallets are smoothly loaded and unloaded from the.

Business Update — Eastrong, China

- **End to End control:** Integrated one stop service from factory pickup to delivery at destination port

Oversized Cargo Air Charter

97-Ton Power Infrastructure Project Cargo | Hong Kong → Sydney via Boeing 747-8F

This project covers 72 galvanized steel tower components for an Australian power infrastructure project with a total weight of 97 tons. Eastrong coordinated key operations across mainland China and Hong Kong, covering factory pickup in Changshu, special road transportation, cross-border handling, airport build-up, cargo securing and loading support, with full process professional management.

Project Highlights:

- 97 tons of oversized cargo consisting of 72 extra-long components, loaded onto 9×20 ft and 3×16 ft aircraft pallets
- Two segment land transportation via Shenzhen to Hong Kong, supported by large crane operations and secured with 22 heavy duty lashing straps
- Boeing 747-8F freighter: Took off from Hong Kong on 13 August 2026 and flew directly to Western Sydney
- Multi location collaboration: Centralised project management in Shanghai with on-site execution by Shenzhen and Hong Kong teams

Eastrong delivers custom-built air charter and logistics solutions specialising in oversized, heavy-weight and time-sensitive cargo shipments.

Eastrong provides customized charter and logistics solutions for oversized, heavy and time-critical shipments.

Talk to Eastrong about your next project cargo movement.

HKG (Hong Kong) → WSI (Western Sydney)

Boeing 747-8F Charter Departs, Non-stop to Australia

12 Pallets were sequentially into the B747-8F via the main cargo side door. After door closed, the charter flight flight to-to ff on schedule. Approximately hours later, 97 ton tyer devert the depilts save saed andetern a Stren Interntal Kong Airport.

▲ The B747-8F assigned to this project. Silk Way West full freighter on the apron of Hong Kong Airport.

▲ Hong Kong Airport, Boeing 747-8F side door loading operation. The main cargo side door is fully opened. The high loader

Inside the main cargo hold. Pallets are secured sequentially on the roller floor, awaiting door closure.

Change Management for Hyperion ARCS Netting**Overview of the To Be Process**

CNC will share required **SOA format** in which Netting participants will have to share their data (O/s AR+AP at invoice level). On receipt of the SOA from Netting participants, CNC will then upload these SOA a shared file folder where, **EPM** will automatically process the file & then Records will match with counter party books. **NC will share required SOA format in which Netting participants will have to share their data (O/s AR+AP at invoice level). On receipt of the SOA from Netting participants, CNC will then upload these SOA a shared file folder where, EPM will automatically process the file & then Records will match with counter party books.**

Data would be processed as and when data file (SOA template) would be placed in the shared folder for initial upload and changes. Post processing, matching report will be shared

We are currently planning to have 4 pre reporting and 1 final reporting to be executed during One ARCS Hyperion Netting cycle. The number of pre-cycles can be increased or decreased by CNC as and when required.

Basis matching done in **EPM** system, Netting Participants will receive **MATCHED**, **SUGGESTED MATCH** and **UNMATCHED** report at invoice level during all the netting cycles (Pre & Final run)

Basis Pre Reports shared by CNC, Netting Participant can perform their Follow-up with counter parties on their **SUGGESTED MATCH** and **UNMATCHED** transactions, They can add approved AP invoices in **SOA template** & follow-up with counter parties for their unapproved AR invoices as mentioned in unmatched report. For Next Pre-run or Final Run, Netting participants will have to share their Revised **SOA template** CNC and the same will be uploaded in Replace Mode for the participant's complete data. If CNC doesn't receive **Revised** version of your SOA then last received version in that month Netting will be considered for matching.

On Final day of the run, Final Matched Transactions and Final Netting Settlement report will be shared by CNC via e-mail.

Netting Participants will book manual netting vouchers in their ERP as being done earlier, based on the Final Netting Settlement report shared by CNC. Settlement should be done "To / By" CNC as per amount mentioned in Settlement Report & Dates mentioned in Netting Calendar.

Change Management for Hyperion ARCS Netting

HYPERION BENEFITS

- Automated & Transparent Invoice approval process
- Dispute resolution at invoice level
- Proper Audit trail at invoice level for Balance confirmation
- Auto matching/ confirmation & auto Netting Journal booking
- No more holding back of approved invoices

FAQ's

Q1. How would I know if I made a mistake in the manual Excel upload template?

Ans: In Manual Excel SOA Template we have given Instructions on “How to fill Excel SOA” Users can read those Instructions carefully before updating SOA. Also we have develop a macro within SOA template which can validate SOA for all possible human errors and provide error log to users which enable them to correct their mistakes.

Q2. Do I need to control use of any special characters in the manual Excel upload template?

Ans: Yes, You can not use special characters like comma (,) & semi colon (;) anywhere in excel SOA template. Also you should not keep any single cell blank if you have use any invoice line. If there is no information to provide then you can use “NA”

Q3. What if the payable is not booked at all or payable is booked wrongly?

Ans: If any payable invoice is Approved but you have not mentioned in your initial SOA then you can add that invoice in your Revised SOA & share that with CNC in order to match that invoice in next Pre/Final Run. If you have booked any

Receivable or Payable invoice incorrectly then you need to correct that in your ERP system as well as in Revised SOA & share correct data with CNC in order to match those invoices in next Pre/Final Run

Q4. Will “Data Confidentiality” will be maintained during this Netting process?

Ans: Yes, 100% This Hyperion Netting Activity will be carried out by 3rd party vendor & Your Receivable & Payable data will not be shared within Network. In Pre & Final Reporting as well you will receive only those transactions data which is either in your books & in your counterparty books (which related to your office only) Hence Pls. be 100% assure about “Data Confidentiality”
