New Agent —RIF Europe, BV

RIF Europe Progression

Since opening in the Netherlands in approx. 500 sq. metre of shared warehouse space two years ago, **RIF Europe** has grown at an astonishing rate.

From three employees (two full time) in June 2019, we are now at 65 FTEs including Management and haven't finished growing yet. Our footprint in the Netherlands is now just over 16,000 sq. metres with the opening of our flagship operation to manage our largest client for whom we assemble specialist packaging to carry the COVID-19 vaccine.

Our original customer in the Netherlands dispatched 20 e-commerce orders on our first day in June 19; in May we dispatched over €1.1m worth of product on their behalf! Our clients in the Netherlands cover fashion, sport and automotive as well as promotional materials.

Part of our growth has included the formation of a dedicated customer service team and **Andre Silveira** is a shining example of excellent customer relations. **Andre** joined us in January and has created a real bond with our customer. We are a multinational team with Dutch nationals, UK 'emigres' and colleagues from as far apart as Mexico, South Africa and Eastern Europe.

We haven't been insulated against the UK's struggles with Brexit but our distribution partners have worked with us to ensure we continue to provide an excellent service in Europe and beyond. The next two years will be equally as challenging and exciting as the last and we are looking forward to the challenge.

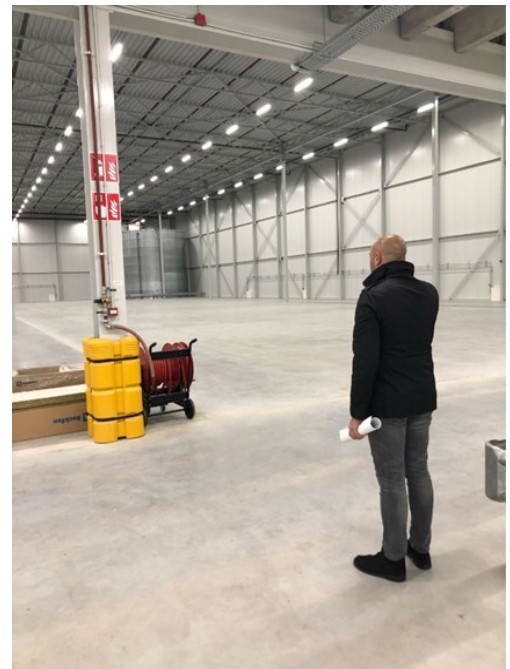

New Agent —RIF Europe, BV

A big step in May 2021 for **RIF Europe**, with confirmation of our new 110,000 square foot warehouse in The Netherlands. 21 Dreamstreet, is our 3rd DC in NL and takes our logistics footprint there to +250,000 square foot - just 16 months since opening our doors there for the first time.

Continued incredible work from the team, time was well spent with our talented **Daan McGrath** running through the impressive design plans for the building.

New Agent —RIF Europe, BV

12th November 2020 marks a landmark day at RIF Europe

Official handover of keys for our 2nd warehouse in Amsterdam, directly opposite our 1st (just 200 metres). That gives us great options to manage manpower to ensure we can cater for our client’s growth spikes. This brings our logistics space to 100,000sq ft in The Netherlands, just 13 months after commencing business!

Within 20 minutes of key handover, we were unloading a 40’ container containing new stock for one of our clients! It’s filling fast, we have multiple new client integrations scheduled for the next 3 months. We are very proud of the team at **RIF Europe** and would like to thank you for all your continued hard work.

In only 3 months, on 12th February 2021 it was clear to see the staggering progress that has been made by the **RIF Europe** team! It’s quite hard to believe that is the same warehouse as the one back in November 2020. A huge well done to everyone at **RIF Europe**, the transformation is incredible!

It’s an amazing team effort that has taken place and continues to take place in the Netherlands.

November 2020

February 2021

New Member—RIF Europe, BV

Here at RIF Europe, we are incredibly proud and pleased to announce that the talented **Mr. Dico Verbeek** has joined the team!

This is a major appointment for RIF Europe, and we are incredibly excited to gain the standards and services of such an experienced and talented business leader.

Dico Verbeek has a big job within our fast-growing business in The Netherlands and will be the leader of our international freight division. He will immediately inherit 20,000 sq ft of warehouse space within our DC1 facility in which to operate a variety of cross-dock, ocean, and airfreight business on behalf of our clients.

A big part of Dico's job is to expand and develop our freight business licences with the aim of bringing every element of our service under our own roof, thus making us even more able to serve every facet of our clients' service needs.

Dico has vast experience in the international freight business and joins us after 25 years in his previous position. He is a

natural leader and has already made great strides in assembling his team to push this growth.

The long established and comprehensive overseas office network already in place RIF Worldwide Plc gives Dico and his team a ready made platform in which to develop supply chains for clients. Full integration is also planned with the market leading freight management systems used by RIF Worldwide Plc, meaning that the scalability for growth is robust and ready to go.

New clients wins and engagement with senior decision makers remains at an all-time high, and with a talented man like Dico now on board we simply could not be happier about our plans. By bringing Dico and his team to our newly founded business in The Netherlands we aim to offer the same level of services to all clients.

RIF Europe will now be the new official member for The Netherlands in the HCL Network. Many of the HCL members will know Dico from his time with Tigers. The RIF Group Directors are confident that Dico will maintain the highest possible standards & service levels that have been consistently provided by RIF over the years.

Dico can be contacted at—DVerbeek@rifeurope.eu

Business Update—ECU Worldwide—Ghana & Ivory Coast

Trade and Industry Update

THE AVVASHYA GROUP

Cathay Cargo starts using Envirotainer Releye pharma solution

Cathay Pacific Cargo has started using Envirotainer's Releye RLP temperature-controlled container.

The carrier said it is the first in Asia to use the pharma solution.

According to Envirotainer, the LD11-size container's air flow technology enables temperature stability and it was designed to meet shippers' requests for greater load flexibility.

It fits three Euro pallets (or two-US pallets), filling a gap between the larger RAP and smaller RKN-size containers to enable mixing and matching of pallet sizes.

The unit uses rechargeable batteries to power its electric heating and compressor cooling system, which can be controlled from an external panel. A single battery charge will power the system for over 170 hours. It also offers fully integrated live monitoring.

Cathay's general manager of cargo service delivery Frosti Lau said: "It will allow us to offer yet more choice to our customers for transporting temperature-sensitive shipments. This is especially important at this moment, when vaccines and other life-saving pharmaceutical shipments are in such critical demand in different parts of the world. The advanced cool-chain technology that has gone into the design of the container is an example of the innovation that will help move our industry forward."

Envirotainer head of global key accounts airlines Don Harrison added: "Cathay Pacific Cargo is a long-term partner to Envirotainer, and I'm thrilled that it is the first airline in Asia-Pacific to qualify our latest innovation, the new Releye RLP container. Cathay Pacific Cargo's extensive network and Pharma Lift product will continue to be an asset to pharma shippers globally; now with the inclusion of the Releye RLP, its impact will be even greater."

JD adds first China-US cargo flights

E-commerce platform JD.com has continued to ramp up its air cargo network with the launch of its first cargo flight between China and the US

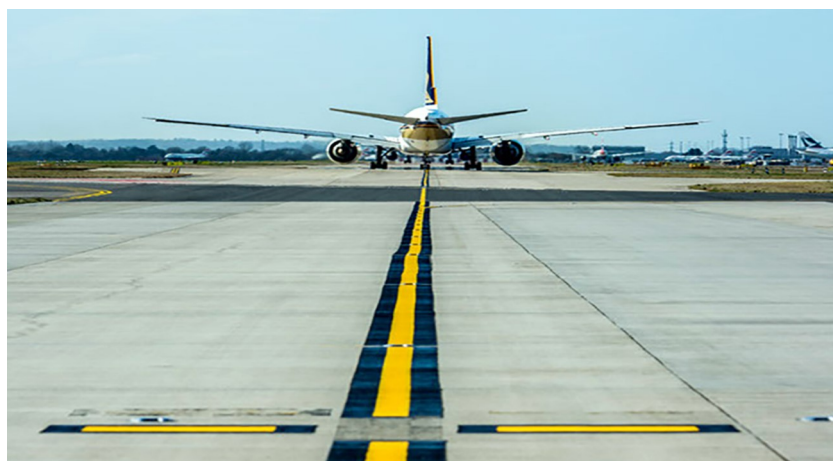

The service between Nanjing Lukou International Airport and Los Angeles International Airport will be operated three times a week by China Eastern Airlines.

The first flight took place on June 7. Images show the flight being operated with an A330 passenger aircraft.

JD.com said that the route will be able to deliver products from China's two major manufacturing regions — Shanghai and Shenzhen — and will mainly carry cross-border e-commerce products such as apparel and fast-moving consumer goods (FMCG).

"The flight will be able enable transportation from China to clients in the US as fast as 48 hours, greatly reducing the fulfilment time and further stimulating goods transport between the two countries," the company said.

JD is aiming to build what it calls a "double 48" network to deliver from China to the destination country within 48 hours and deliver to the end customer within 48 hours.
