Change Management for Hyperion ARCS Netting

Overview of the To Be Process

<p>CNC will share required SOA format in which Netting participants will have to share their data (O/s AR+AP at invoice level). On receipt of the SOA from Netting participants, CNC will then upload these SOA a shared file folder where, EPM will automatically process the file & then Records will match with counter party books. NC will share required SOA format in which Netting participants will have to share their data (O/s AR+AP at invoice level). On receipt of the SOA from Netting participants, CNC will then upload these SOA a shared file folder where, EPM will automatically process the file & then Records will match with counter party books.</p>
<p>Data would be processed as and when data file (SOA template) would be placed in the shared folder for initial upload and changes. Post processing, matching report will be shared</p>
<p>We are currently planning to have 4 pre reporting and 1 final reporting to be executed during One ARCS Hyperion Netting cycle. The number of pre-cycles can be increased or decreased by CNC as and when required.</p>
<p>Basis matching done in EPM system, Netting Participants will receive MATCHED, SUGGESTED MATCH and UNMATCHED report at invoice level during all the netting cycles (Pre & Final run)</p>
<p>Basis Pre Reports shared by CNC, Netting Participant can perform their Follow-up with counter parties on their SUGGESTED MATCH and UNMATCHED transactions, They can add approved AP invoices in SOA template & follow-up with counter parties for their unapproved AR invoices as mentioned in unmatched report. For Next Pre-run or Final Run, Netting participants will have to share their Revised SOA template CNC and the same will be uploaded in Replace Mode for the participant's complete data. If CNC doesn't receive Revised version of your SOA then last received version in that month Netting will be considered for matching.</p>
<p>On Final day of the run, Final Matched Transactions and Final Netting Settlement report will be shared by CNC via e-mail.</p>
<p>Netting Participants will book manual netting vouchers in their ERP as being done earlier, based on the Final Netting Settlement report shared by CNC. Settlement should be done "By" CNC as per amount mentioned in Settlement Report & Dates mentioned in Netting Calendar.</p>

Change Management for Hyperion ARCS Netting

HYPERION BENEFITS

- Automated & Transparent Invoice approval process
- Dispute resolution at invoice level
- Proper Audit trail at invoice level for Balance confirmation
- Auto matching/ confirmation & auto Netting Journal booking
- No more holding back of approved invoices

FAQ's

Q1. How would I know if I made a mistake in the manual Excel upload template?

Ans: In Manual Excel SOA Template we have given Instructions on "How to fill Excel SOA" Users can read those Instructions carefully before updating SOA. Also we have develop a macro within SOA template which can validate SOA for all possible human errors and provide error log to users which enable them to correct their mistakes.

Q2. Do I need to control use of any special characters in the manual Excel upload template?

Ans: Yes, You can not use special characters like comma (,) & semi colon (;) anywhere in excel SOA template. Also you should not keep any single cell blank if you have use any invoice line. If there is no information to provide then you can use "NA"

Q3. What if the payable is not booked at all or payable is booked wrongly?

Ans: If any payable invoice is Approved but you have not mentioned in your initial SOA then you can add that invoice in your Revised SOA & share that with CNC in order to match that invoice in next Pre/Final Run. If you have booked any Receivable or Payable invoice incorrectly then you need to correct that in your ERP system as well as in Revised SOA & share correct data with CNC in order to match those invoices in next Pre/Final Run

Q4. Will "Data Confidentiality" will be maintained during this Netting process?

Ans: Yes, 100% This Hyperion Netting Activity will be carried out by 3rd party vendor & Your Receivable & Payable data will not be shared within Network. In Pre & Final Reporting as well you will receive only those transactions data which is either in your books & in your counterparty books (which related to your office only) Hence Pls. be 100% assure about "Data Confidentiality"

Appreciation Message

"I take this opportunity to thank Ms. Helen of BFL logistics, Korea for her efforts and her responsiveness. We have been able to secure a good amount of business due to her support at origin and the quick turnaround time for all our queries definitely makes an impact. Helen, thank you once again and Best wishes for the times to come "

Helen PYO (Ms.)

Best Regards,

Business Update— ASIAPAC TURKEY

Fasten your seat belts and be ready to take off with ASIAPAC!

As Asiapac Turkey team, which has accomplished great things in a short time, we continue to take great steps to carry our successes in the ocean services to the air freight services. Our aircargo volume continues to increase day by day thanks to our professional colleagues who are experts in the field of air transport, who have recently joined the team. Our team that organizes only air shipments, promises to offer you the best rates with fast replies in your import and export shipments. Our air freight services are adjustable as urgency or requirement change, allowing our clients access to what they need with the visibility require.

Our air freight services include:

Standard Services

- Back to Back Shipments
- Air Consolidation
- Door to Door Service (Consolide and Dedicated trucks)
- Transit/ Cross Trade Shipments
- Multi Modal Shipments
- Garments & Fashion- GOH / Automotive / Chemicals

Special Cargo

- Perishable Goods (Fruits, Vegetables, Foodstuff, Hatching Eggs)
- Pharma
- Dangerous Goods
- Live Animal
- Cars/ Vehicle Transportation
- Charters / Project cargo

Express

- Time Critical Shipments
- Automotive Logistics 7/24
- AOG/ Aerospace shipments
- Handcarry/ OBC

Here is our team’s contact details;

Industry Update

Etihad Cargo achieves IATA CEIV pharma recertification

Etihad Cargo has been recertified as meeting IATA's CEIV Pharma standards.

The cargo division of Etihad Aviation Group achieved IATA CEIV Pharma recertification following an audit by independent validators that assessed the carrier's capacity to control and enhance its processes through a checklist that focused on Etihad Cargo's Quality Management System incorporating supplier management, training programs, processes and procedures, audit programs, and quality enhancement, among others.

Achieving recertification demonstrates Etihad Cargo's and its dedicated pharmaceutical transportation product PharmaLife's full compliance with specific pharmaceutical regulations, including IATA Temperature Control Regulations (TCR), Good Distribution Practices (GDP), a quality system for warehouses and distribution centers dedicated to medications and life sciences products.

The UAE's national carrier first achieved IATA CEIV Pharma certification in 2019 in conjunction with its hub at Abu Dhabi International Airport and Etihad Airport Services Cargo.

Etihad Cargo went on to become the first airline in the Middle East and only the third globally to hold the trilogy of CEIV Pharma, CEIV Fresh and CEIV Live Animals certifications, said Etihad.

Martin Drew, senior vice president – global sales & cargo at Etihad Aviation Group, said: "Etihad Cargo is proud to achieve IATA CEIV Pharma recertification following an extensive audit.

"This industry-wide standard ensures Etihad Cargo's operations and staff comply with all applicable standards, regulations and guidelines expected from pharmaceutical manufacturers.

"The benefits of CEIV Pharma certification extend to Etihad Cargo's customers, who can be assured the carrier's dedicated pharma cargo management constantly monitor and analyze the quality and safety of Etihad Cargo's PharmaLife product performance.

"Etihad Cargo fully supports Abu Dhabi's vision of becoming a life sciences and pharmaceutical hub. Achieving recertification and providing world-class pharmaceutical logistics solutions demonstrates Etihad Cargo's capabilities in seamlessly transporting life-saving medicines and the latest treatments around the world from the carrier's Abu Dhabi hub."

Etihad Cargo has invested in its PharmaLife product since achieving IATA CEIV Pharma certification for pharmaceutical logistics in 2019.

In addition to launching dedicated thermal covers for PharmaLife products across its top pharma origin stations, Etihad Cargo recently announced the upcoming launch of a **new 3,000 sq m pharma facility** at its Abu Dhabi hub.

Market Update—Premiere Logistics Ltd, China

PREMIERE | logistics

Article 1

PREMIERE | logistics

Logistics plays including SF Express, Cainiao aim for skies with air cargo

Chinese logistics companies are beefing up efforts to invest in the air cargo segment and expand their global footprint as part of broader push to build logistics networks across the globe, improve delivery efficiency and ensure the stability and smooth operation of supply chains, experts said.

Ezhou Huahu Airport in Hubei province, which is backed by Chinese logistics service provider SF Express, recently launched its first all-cargo air route linking Ezhou with Shenzhen, Guangdong province.

As the first dedicated air freight airport in Asia and the fourth of its kind in the world, Ezhou Huahu Airport is expected to open over 50 domestic routes and 10 international cargo routes by 2025, with cargo throughput reaching 2.45 million metric tons.

Wang Wei, chairman of SF Express, said the company will speed up the construction of Ezhou Huahu Airport and aims to build a world-class international air cargo hub.

The airport will open another all-cargo route from Ezhou to Shanghai soon, and is scheduled to add international routes connecting with Osaka, Japan and Frankfurt, Germany within this year. SF Express' freight transit center located at the airport is expected to begin operations in the second half of 2023.

Other logistics firms have invested heavily in providing air cargo services and building global logistics infrastructure. JD Logistics, an arm of Chinese e-commerce platform JD, has received approval from aviation authorities to put its self-owned air cargo fleet into operation.

Market Update—Premiere Logistics Ltd, China

The company said it will first develop domestic air cargo to cover major cities nationwide and accelerate its layout in international air cargo markets likes North America, Europe, the Middle East, Southeast Asia, Japan and South Korea by the end of 2025.

JD Logistics is stepping up efforts in the construction of logistics infrastructure globally. It has launched self-operated overseas warehouses in the United States, Germany, the Netherlands, France, the United Kingdom, Southeast Asia, the Middle East and Australia.

Yang Daqing, deputy director of research at the China Federation of Logistics and Purchasing, said currently, air cargo only occupies a relatively small portion of China's comprehensive transport system, which cannot meet consumers' fast-growing demand for high-tech products as well as cold chain logistics services covering the transport of fresh commodities and medicines.

Developing international air freight business will help enterprises boost long-haul freight capacity, establish overseas logistics networks and further improve cross-border delivery efficiency, Yang said.

Cainiao Network, the logistics arm of Alibaba Group, has set up six smart logistics hubs around the world, operates more than 3 million square meters of cross-border logistics warehouses and has over 240 chartered flights for trunk logistics every month.

To reinforce its global logistics network, Cainiao has expanded the number of its overseas distribution centers to 12, with a focus on last mile deliveries and smart lockers to optimize and localize its services in destination countries.

Last month, the company announced it had launched its first smart distribution center in Brazil, and plans to launch another nine distribution centers in the country in the next three years.

"Overseas warehouses serve as vital infrastructure that boost growth in the nation's cross-border e-commerce sector," said Zhang Zhouping, a senior analyst of business-to-business and cross-border activities at the Internet Economy Institute, adding such facilities enable quicker Customs clearance, faster delivery and lower costs.

Market Update—WINDLOG, BRAZIL

AEO Program: advantages for certified companies

The AEO Program (Authorized Economic Operator) certifies logistics chain operators as reliable for foreign trade operations.

So, to earn this certification and become a strategic partner of the Federal Revenue of Brazil (RFB), it is necessary to meet the requirements established by the program.

In this way, certified companies receive benefits and facilities in customs procedures, such as:

- Agility and predictability in foreign trade operations;
- Priority in cargo checking;
- Direct contact between the Brazilian Federal Revenue Service and the company;
- Cost reduction.

In addition, the Mutual Recognition Agreement between countries (MRA), which is bilateral, recognizes similar AEO certifications from Customs, from different countries, as equivalent to each other. As a result, cargo receives priority treatment, with fewer storage costs, to increase competitiveness.

Joining the OAS program is voluntary; until October 2022, 507 different CNPJs were certified, according to data from the RFB website. The OEA certification modalities are: OEA Safety (OEA-S) and OEA Conformity (OEA-C), levels 1 and 2.

Brazil and the United States signed a partnership between their OAS programs.

ABOUT WINDLOG

Windlog is one of the main logistics companies in Brazilian market. With more than 5000 clients, 10 offices in the whole country and international agents around the world. In 17 years Windlog has consolidated itself as one of the best freight forwarder in Brazil, with 3 certifications, AEO, ISO 9001 and ISO 14001

Market Update—WINDLOG, BRAZIL

AEO Program: advantages for certified companies

The RFB published on its website the news of a Mutual Recognition Agreement with the United States Customs, which was signed on 10/16/2022, in Washington DC, according to the note:

"With the signing of the Brazil-USA agreement, the Brazilian OAS Program now demonstrates compatibility with the Customs-Trade Partnership Against Terrorism (C-TPAT), one of the largest certification programs for security in the supply chain in the world."

In this sense, in addition to the benefits already mentioned, this partnership:

- Recognize operators with OEA-Safety certification as safer and with less risk;
- It will promote greater agility and fewer inspections for customs procedures for Brazilian cargo.

Furthermore, the US is Brazil's second-largest trading partner. Therefore, it is believed that more Brazilian companies, aiming at the great opportunities that this agreement can bring, will seek certification from the OAS Program.

More benefits

In the year 2022, new benefits, advantages, and facilities were granted to Brazilian AEOs:

- Expansion of the advantages of members of the OAS-C modality, prioritizing the analysis of the consultation process on the interpretation of tax and customs legislation, as well as the classification of services;

**Market Update—WINDLOG,
BRAZIL****AEO Program: advantages for certified companies**

- Ordinance published on 10/03/2022 grants priority to judgments of tax administrative processes within the scope of the Federal Revenue Judgment Offices;
- In bonded areas, AEO loads are the priority in access, loading, unloading, release, storage, etc. (See conditions to enjoy the preferences).

Windlog is certified as an Authorized Economic Operator. Since 2019, Windlog has been approved for quality and safety by the OAS Program to guarantee security and agility, minimizing risks in its foreign trade operations.

Thus, in addition to the various exclusive benefits granted to the company by Brazilian Customs, Windlog reinforces its commitment to transparency and quality with its customers, partners, and suppliers.
