Business Update — RIF Group

Delivering Excellence Every time Everywhere

NEW PRODUCT LAUNCH! 🚀

We are excited to announce that the first container of our Rail Service Product from China has officially departed on 27/09, marking a significant milestone in our logistics operations.

This new service offers an efficient and reliable transportation solution, bridging the gap between China and international markets with faster transit times and cost-effective delivery.

The departure of this inaugural container underscores our commitment to enhancing supply chain options and providing flexible, high-quality shipping alternatives for our valued customers.

Looking for a quick and efficient shipping solution from China to Europe?

RIF Group's rail freight services offer a powerful alternative to traditional methods. With weekly departures and a transit time of just 17 days from Xian to Duisburg, we ensure your cargo reaches its destination swiftly and safely.

Our extensive network across China and Europe allows us to provide comprehensive LCL and FCL services tailored to your needs. From customs clearance to final delivery, we manage every detail so you can focus on growing your business while we take the stress away.

Our next cut-off (after Golden Week) is Friday 11th October, for Saturday 19th October's departure from Xian, arriving in Duisburg on Monday 4th November.

Ready to optimise your supply chain? Let's talk about how we can help!

Email railgb@rifworldwide.co.uk for more information.

Business Update— Windlog

Windlog Birthday

20 years of dedication, transparency, and seriousness.

On September 14th, we proudly celebrated two decades of a story built through countless challenges successfully overcome with complete satisfaction.

These are 20 years of dedication, transparency, and seriousness, values that, along with our vast experience, have established us as one of the leading names in international freight forwarding and customs clearance.

We celebrate these 20 years of our journey with great joy and gratitude. We thank all of our clients and partners for being part of this successful journey. You are an essential part of our story and our strength to keep moving forward.

Change Management for Hyperion ARCS Netting

Overview of the To Be Process

CNC will share required <u>SOA format</u> in which Netting participants will have to share their data (O/s AR+AP at invoice level). On receipt of the SOA from Netting participants, CNC will then upload these SOA a shared file folder where, <u>EPM</u> will automatically process the file & then Records will match with counter party books.NC will share required <u>SOA format</u> in which Netting participants will have to share their data (O/s AR+AP at invoice level). On receipt of the SOA from Netting participants, CNC will then upload these SOA a shared file folder where, <u>EPM</u> will automatically process the file & then Records will match with counter party books.

Data would be processed as and when data file (SOA template) would be placed in the shared folder for initial upload and changes. Post processing, matching report will be shared

We are currently planning to have 4 pre reporting and 1 final reporting to be executed during One ARCS Hyperion Netting cycle. The number of pre-cycles can be increased or decreased by CNC as and when required.

Basis matching done in **EPM** system, Netting Participants will receive **MATCHED**, **SUGGESTED MATCH** and **UNMATCHED** report at invoice level during all the netting cycles (Pre & Final run)

Basis Pre Reports shared by CNC, Netting Participant can perform their Follow-up with counter parties on their <u>SUGGESTED MATCH</u> and <u>UNMATCHED</u> transactions, They can add approved AP invoices in <u>SOA template</u> & follow-up with counter parties for their unapproved AR invoices as mentioned in unmatched report. For Next Pre-run or Final Run, Netting participants will have to share their Revised <u>SOA template</u> CNC and the same will be uploaded in Replace Mode for the participant's complete data. If CNC doesn't receive <u>Revised</u> version of your SOA then last received version in that month Netting will be considered for matching.

On Final day of the run, Final Matched Transactions and Final Netting Settlement report will be shared by CNC via e-mail.

Netting Participants will book manual netting vouchers in their ERP as being done earlier, based on the Final Netting Settlement report shared by CNC. Settlement should be done "To / By" CNC as per amount mentioned in Settlement Report & Dates mentioned in Netting Calendar.

Change Management for Hyperion ARCS Netting

HYPERION BENEFITS

- Automated & Transparent Invoice approval process
- Dispute resolution at invoice level
- Proper Audit trail at invoice level for Balance confirmation
- Auto matching/ confirmation & auto Netting Journal booking
- No more holding back of approved invoices

FAQ's

Q1. How would I know if I made a mistake in the manual Excel upload template?

Ans: In Manual Excel SOA Template we have given Instructions on "How to fill Excel SOA" Users can read those Instructions carefully before updating SOA. Also we have develop a macro within SOA template which can validate SOA for all possible human errors and provide error log to users which enable them to correct their mistakes.

Q2. Do I need to control use of any special characters in the manual Excel upload template?

Ans: Yes, You can not use special characters like comma (,) & semi colon (;) anywhere is excel SOA template. Also you should not keep any single cell blank if you have use any invoice line. If there is no information to provide then you can use "NA"

Q3. What if the payable is not booked at all or payable is booked wrongly?

Ans: If any payable invoice is Approved but you have not mentioned in your initial SOA then you can add that invoice in your Revised SOA & share that with CNC in order to match that invoice in next Pre/Final Run. If you have booked any

Receivable or Payable invoice incorrectly then you need to correct that in your ERP system as well as in Revised SOA & share correct data with CNC in order to match those invoices in next Pre/Final Run

Q4. Will "Data Confidentiality" will be maintained during this Netting process?

Ans: Yes, 100% This Hyperion Netting Activity will be carried out by 3rd party vendor & Your Receivable & Payable data will not be shared within Network. In Pre & Final Reporting as well you will receive only those transactions data which is either in your books & in your counterparty books (which related to your office only) Hence Pls. be 100% assure about "Data Confidentiality"
